

**THE BETTER BUNGEE**

**Polyurethane Bungee Straps**

Industrial strength polyurethane and heavy-duty hook ends make safer, stronger bungee cords and straps. High-tech, lightweight material will not break, rot, or become brittle when exposed to harsh weather elements, oils, or fuels.

**Cords**—Glass-filled nylon hooks are overmolded into a one-piece cord for superior performance and durability. Max. stretch is two times length. Hook ends have a 180# break rating. Synch cord has loop on one end and hook on the other.

**Straps**—High-tech industrial strength urethane straps are available with three types of hook ends: S-Hook 2 0.188 (3.16) galvanized steel with a 250# break rating; S-Hook stainless steel with a 225# break rating; or J-Hook fiber-filled nylon overmolded ends (rated at 180#) for nonmarring applications. Two times max. stretch. Straps with slots are adjustable to just about any size and are available with stainless steel or overmolded nylon ends.

**BULK STRAP**  
**Custom Strapping, Buckles, and Fittings**

**CUSTOM STRAPPING**

Create custom-length straps with no stitching required.

**Nylon**—Strong and flexible material has good elasticity and recovery. Absorbs moisture, dries easily, and is mildew- and insect-resistant.

**Polyester**—Durable material is quick drying. Resists most chemicals, stretching and shrinking, wrinkles, mildew, and abrasion. For medium- and heavy-duty applications.

**Polypropylene**—Material features excellent chemical resistance and low moisture absorption. Floats and is resistant to mildew and abrasion. For lightweight applications.

**BUCKLES AND FITTINGS**

Metal or plastic attach without sewing to make finished assemblies.

**ANCHOR PLATES**

Secure webbing to a solid surface. 1" plates have ¼" bolt hole. 1½" to 2" plates have ⅜" bolt hole. Webbing slots will accommodate 1", 1.5", and 2" webbing, offset at 128°.
