## Teardrop Roll-Formed Pallet Rack Components

- Fully-welded, steel teardrop frame design
- Boltless assembly
- Choose frames, beams, and wire decking separately for custom configurations

**Upright Frames**—Feature teardrop punch pattern every 2". Horizontally and diagonally braced frames create a strong, stable system. Standard prepunched footplates make anchoring easy. Corrosion-resistant, green polyurethane finish.

**Beams**—Beams feature a safety clip which cannot be sprung or removed without first removing the beam; no special tools required. An audible click or simple glance confirms the lock is engaged. Corrosion-resistant, orange polyurethane finish.

**Beam**  
**21E914**

**Welded Upright Frame**  
**1KBC1**

## Teardrop Roll-Formed Pallet Rack Components

- Boltless assembly
- Seismic components are available online, see Grainger.com

Closed tubular columns and braces generate 250% greater durability against fork truck damage.

**Upright Frames**—Multiple offset anchor holes provide flexibility in anchor placement. Footpad with nesting ridge provides easy shim

nesting, and flush footpad to column base evenly disperses load weight. Vista green powder-coat finish.

**Beams**—Teardrop and rivet design with heavy-duty connection plates allows easy installation and greater connection integrity. Auto-engaging safety clip resists beam disengagement and provides an audible click when secured. Poppy orange powder-coat finish.
