

Athletic and Tactical Gear Lockers

Lockers have large storage compartments that hold bulky protective gear, uniforms, and other equipment. Suitable for personal storage in sporting facilities, firehouses, police stations, and military training facilities.

TA-50 military lockers have perforated sides, backs, and doors to allow full ventilation. Heavy-duty steel construction designed for use in military and law enforcement facilities. Include padlock hasp.

Firefighter open-front lockers provide easy access and visibility to all gear. Welded steel construction with ventilated sides.

Open-front ventilated plastic lockers have durable polyethylene construction that won't rust or dent. Foot locker has padlock hasp and can be used for seating.

Open-front wood lockers with lower foot locker/bench offer an upscale appearance for fitness clubs and sporting facilities.

Modular solid lockers have steel construction with louvered back panels that accept hooks and other compatible accessories to customize the storage space. Solid doors. Include padlock hasp.

Compartmented solid locker has steel construction with 4 separate vertical compartments: 3 doors and a bottom drawer. Solid door and keyed lock on each compartment.

Mobile-Device Lockers

- Powder-coated finish
- Units are assembled; unassembled units available on Grainger.com

Sized to hold and secure personal electronic devices. Typically installed in offices, hotels, and other public facilities.

Surface-mount lockers can be mounted on a wall or flat surface. Multiple tiers of individual lockers are arranged vertically.

Wiring-ready full-height lockers have built-in channels with knockouts in each locker allowing wire to be run so lockers can serve as charging stations. Multiple tiers of individual lockers securely hold laptops and small electronic devices.

Electronic Keypad locks are battery-operated with a 4-digit code required for access. Can be set to day-use or permanent-use mode. Low battery indicator with mechanical master key override.

Keyed locks come with master keys to access all compartments.

Combination locks are built-in and can be set to a fixed combination or combination can be reset after each use.
