Stacking & Nesting Totes

- Save space when not in use
- Lids ordered separately

Sturdy plastic totes have sidewalls that angle outward from the base up so that same-sized totes can fit within each other when empty. Wide-rim ledges enable totes to stack on top of one another. Use for medium to long-term storage, shipping products, and assembly manufacturing applications.

Cross-stacking totes have indented sidewall rims that allow sideways stacking of compatible totes.

Standard Divider Boxes & Accessories

- Black dividers and clear lids
- Dividers and lids are ordered separately

Plastic boxes separate and organize small items within one bin. Boxes have interior grooves that

accommodate dividers to make custom-sized compartments within the box. Stackable boxes can fit on racks and shelving. Commonly used in health-care, manufacturing, and distribution facilities.

ESD Static-Control Divider & Storage Boxes

- Black color

Separate, organize, and store sensitive electrical equipment like computer chips, transistors, and light-emitting diodes (LED). Made of conductive plastic or cardboard materials that dissipate static energy and are ideal for protecting sensitive electronic parts and components in transport and storage.

Divider boxes— Slots along the interior walls accommodate dividers and create compartments to organize small parts within one box. Plastic boxes do not include dividers. Cardboard boxes include dividers.

Storage boxes— Cardboard boxes have open interior compartments and can hold large or odd-shaped items. Side handles make them easy to carry.
