

**4 Sliding Windows
w/HVAC Unit
3CHN2**

Note: Dimensions listed do not include HVAC unit dimensions. Call 1-800-GRAINGER (472-4643) for additional dimensions.

Assembled Guard Buildings

Provide shelter and weather protection for security personnel or parking attendants who monitor access to the grounds of a facility. Buildings install on top of an existing concrete pad on the grounds of corporate campuses, government facilities, resorts, stadiums, and other secure areas. Buildings ship to site fully assembled and ready for immediate use. All units include a sliding door with window and hook bolt deadlock, a steel counter, one 115V and one 230V outlet, 12-circuit breaker box, and a fluorescent light fixture (except 3CHN5 and 3CHN6 have 2 fixtures).

Aluminum models have fully insulated R-10 walls and ceiling with a corrosion-resistant aluminum exterior.

Ballistic-rated steel models provide a bullet-resistant shelter for high-security settings such as government and military facilities. Feature ballistic-rated windows, doors, and exterior walls that are fully sheathed in ballistic-rated steel from the floor grade to the roof line. Fully insulated R-10 walls and R-19 ceiling with a white exterior. Conform to standards for UL752 Level 3 ballistic protection.

Mezzanine Platforms

- Capacity: 125 lb./sq.-ft. uniform load
- Gray polyurethane acrylic enamel finish

Platforms bolt together with compatible landings, stair units, and guardrails to create an extra vertical level in a facility and gain additional floor space for work or storage. Connecting hardware has been welded onto the platforms' structural beams and columns by the manufacturer. Commonly used for parts storage, work platforms, archive storage, or crossover platforms in warehouses and other large facilities.

Standard deck is 3/4" OSB and is suitable for office and storage applications in light- to moderate-traffic areas where heavy equipment will not be traveling on the platforms.

Heavy Traffic deck is 3/4" high-density fiberboard and offers extra durability and abrasion resistance. Suitable for high-traffic storage and work applications where pallet jacks and other heavy equipment will be frequently traveling on the platforms.

ACCESSORIES

Guardrail—Welded 1-pc. design with kick plate. Can be easily secured to mezzanine deck surface.

Corner Guardrail—Welded 2-pc. design with kick plate.

Swing Gate—Allows for easy relocation within the guardrail system. Includes latch.

Mezzanine Stair Unit (Without Landing)—Stairs are fully welded with closed risers and nonskid treads. Welded, 1-pc. unit has 34" high fully-welded handrail and 42" high guardrail. Meets IBC.

Mezzanine Landing—Freestanding unit can be installed anywhere on the mezzanine and easily moved to another location. Features steel diamond plate finished floor. Includes a guardrail on 2 sides and vertical corner posts that can accept either left- or right-handed stair placement.
