

Microfiber Charging Buckets

■ Include handle

Buckets presaturate, or "charge" microfiber wet mop pads prior to use. They feature internal markings that identify the appropriate liquid level before mops are added. This prevents spills and oversaturation, making them ideal for healthcare and commercial facilities. 5NY74 fits Rubbermaid Janitorial Carts on page 1470.

Spray Mops & Pads

Spray mops are complete kits including a handle, frame, mop head, and on-board solution reservoir, eliminating the need for a heavy mop bucket, increasing productivity, and decreasing spills due to splashing. **Replacement spray mop pads** are disposable and designed for single use.

Sponge Mops & Heads

Sponge mops are lightweight for ergonomic cleaning of uneven surfaces, such as tile, laminate, and vinyl. They feature an integrated wringer for removing excess liquid between mopping passes. **Mop heads** can be removed for cleaning or replacement. Mops include a handle and replaceable mop head. Heads attach to a compatible handle to replace worn mop heads. Push In connections are made when a handle is pushed into a pocket, or socket

on a compatible mop head or frame. Screw On attaches a female threaded handle to a compatible male threaded mop head. Snap On connects to a compatible mop frame without the use of tools. Slide On attaches the mop head to the handle through a hinged opening on the side or through the front of the connection opening. A wing nut further secures compatible mop heads.
