## Commercial Cleaning Corded Shop Vacuums

Wet/Dry pickup

Commercial vacuums have a single-stage or 2-stage motor that allows more frequent use than general purpose shop vacuums. They are used for cleaning up liquid spills or dirt and debris and are commonly paired with attachments suited for professional office, school, or retail cleaning applications. Standard vacuums filter the outgoing air through the vacuum bag.

Tank Size	Tank Material	Vacuum Hose Dia.	Vacuum Air Flow	Peak HP	Includes	Brand	Mfr. Model	Item No.	
<b>Vacuums</b>									
<b>Standard Filtration</b>									
8 gal	Plastic	1 1/2 in	100 cfm	6	(2) 1.5 in Diameter Extension Wands (91995), (5) 8 Gallon High Efficiency Disposable Filter Bag (90671, Type H), 12 in Floor Nozzle (91991), 6 in Utility Nozzle (90175), 8 ft x 1.5 in Diameter Lock-On Hose, Crevice Tool (91996), Dual Surface Nozzle (91968), Foam Sleeve (90585 Type R), Round Brush (91997), Tool Storage Basket Cartridge Filter (90304, Type U)	Shop-Vac	9258006	784HW0

## Industrial Corded Shop Vacuums

Industrial vacuums provide greater suction than general purpose or commercial-cleaning shop vacuums to pick up heavier particles and liquids. Their 2-stage or 3-stage motor allows high-frequency use for heavy-duty cleanups of dust and dirt or liquid spills. Standard vacuums filter the outgoing air through the vacuum bag. HEPA filter vacuums force air through a fine mesh that traps harmful particles such as pollen, pet dander, dust mites, and tobacco smoke. Vacuums plug into an electrical outlet to generate suction and have a large tank for holding vacuumed debris or liquids. These vacuums withstand frequent use at manufacturing facilities and building or construction sites.
