## Round & Oval Sash Brushes

**Round Sash Brushes** have a blunt, tapered tip with soft edges to cover a large area and is commonly used by faux and decorative finish painters. Sizes are measured by the diameter of the bristle head. **Oval Sash Brushes** have thin, rounded bristles and produce a soft, fuller edge. Used for applying oil-based paints, stains, enamels, and other solvents to window mullions, machinery, pipes, and other narrow areas.

### Artist Brushes

- Soft bristle stiffness
- Surface material: drywall, metal, wood

Natural filament brushes are used to apply paint or sometimes ink to small areas. Thicker ones are used for filling in, and thinner ones are used for touching up details. Wood handle.

### Skive Brushes

- Firm bristle stiffness

Skive brushes or paddle paint brushes are designed for painting both broad marks and edges. They are ideal for spreading thick colors over large surface areas. These brushes make a great finishing brush for faux finishing projects on metal and wood, and are used with all paints and coatings. Feature a natural filament and hog hair material, and wood handle.

## WOOSTER. Varnish Brushes

- Soft bristle stiffness

**Natural-Bristle** brushes such as china bristle (hog's hair) apply oil-based varnish in a thin, even coating reducing streaks and distribute the varnish evenly across a wood surface. **Synthetic Brushes** with flagged (or split) ends hold their shape while providing an ultra-smooth finish when applying water-based varnishes.

### Bent Radiator Brushes

Bent radiator paint brushes are shaped to paint hard-to-reach areas behind pipes, furniture, and other fixtures. The sash is positioned at a 45° angle on a long wood handle. These brushes can be used with all types of paints and stains, on concrete, metal and wood, and for oil and water paint base type.
