Sanitaire® Dayton Bagless, Corded Upright Vacuums

▪ Dry pickup
Bagless, corded upright vacuums collect dirt, dust, and debris in their dirt cup or chamber for disposal. The see-through chamber shows the level of debris, so it can be cleared out when full to prevent reduced suction or an overheated motor. These bagless vacuums eliminate the need for replacement bags and rely on filters to trap dust and allergens and keep debris from entering the motor.

Bissell® Sanitaire® Oreck® Tennant® Bagged, Corded Upright Vacuums

▪ Dry pickup
Corded upright vacuums plug into an electrical outlet to lift dirt from carpet fibers. Reusable bags collect dirt, dust, and debris in bags that can be emptied and reused making it easy to recover small items (such as jewelry and toys). Disposable bags collect dirt, dust, and allergens in replaceable bags that are discarded when full. They minimize contact with collected debris since their disposable bags don't need to be shaken out like reusable bags or cleaned out like a dirt cup. Both types of bags act as filters to trap dust and allergens.
