Ear Plug Dispenser and Refills

Highly visible crank-handle dispenser provides a permanent location for workers to access disposable ear plugs. Tough anodized aluminum construction withstands constant use. Ideal for large factories and process industries that are looking to eliminate packaging waste. Wall-mountable. Holds 500 pairs of disposable ear plugs, sold separately.

Empty Ear Plug Dispensers

Dispensers can hold ear plugs of any brand or style to meet the needs of workers in different areas of a facility. Provide a cost-effective alternative to branded dispensers and allow open access for refilling and acquiring ear plugs. Can be wall mounted or placed on a flat surface to create a dispensing point for ear plugs.

Passive Ear Muffs

Passively block noise by relying on the insulating materials of the padded ear cups that create a seal around the ears. Typically worn in areas where workers don't need to speak with one another and the goal is to block all or most surrounding noise. Ideal for environments with intermittent noise because they can rest around the neck when not in use. As the NRR increases, ear muffs tend to get bulkier due to the larger ear cups and increased insulation materials.
