(Cartridges Sold Separately)

## Half- and Full-Facepiece Respirators

■ NIOSH approved

Cartridges and filters sold separately. Fit test kits available; see page 1618.

### HALF-FACEPIECE RESPIRATORS

**5500 Series**—Comfortable, low-profile design in latex-free materials is an economical choice for subcontractors, plant guests, and occasional users.

**7700 Series**—Medical-grade silicone half mask with a dual flange provides complete face-to-mask sealing and all day comfort.

**RU8500 Series**—Features a speech diaphragm that provides vocal clarity and aids in communication.

**RU8800 Series**—Has a triple flange that provides 3 surface areas to seal mask to the face. Designed to fit the widest range of facial types with silicone construction for all day comfort.

### FULL-FACEPIECE RESPIRATORS

**5400 Series**—Economical models feature a 200° field of vision. Support APR, PAPR, and CF-SAR configurations.

**RU6500 Series**—Soft, durable silicone seal for all day comfort. Models feature the most configurations for APR, PAPR, and CF-SAR using either the center port or side ports.

**7600 Series**—Medical-grade silicone sealing surfaces and a speech diaphragm that allows clear communication. Antiscratch polycarbonate lens provides a 200° field of vision and a downward view for sight in all directions. Support APR, PAPR and CF-SAR configurations.

**7600 Series Welding**—The welding shield can be flipped up or removed when not welding. 2" x 4 1/4" shade plates not included.

### FACEPIECE ACCESSORIES

**Backpack Adapter**—Backpack relocates APR cartridges to wearer's back to accommodate welding faceshields, or to move cartridges away from paint spray to help extend cartridge life. Converts half- (5500, 7700, RU8500, or RU8800 series) to a backpack-style respirator and helps minimize weight on the facepiece.

**Welding Attachment**—Converts 5400 and 7600 Series full-facepiece respirators to a welding respirator. Uses standard 2" x 4 1/4" welding lens, sold separately.

**Spectacle Insert Kits**—Metal spectacle frame with support wire accommodates personal prescription lenses (not included) that are fitted to the frame.
