## Arc Flash & Flame-Resistant Headwear

■ Meet NFPA 70E standards  
Provide protection for the head and neck from burns that can occur when working near electrical hazards.  
**Balaclavas** provide 360° coverage around the head and neck and cover gaps around the collar. Usually worn under headwear and in conjunction with eye and face protection.

**Liner** fits close to the head and can be worn under a hard hat to protect the head, ears, and neck while leaving the face uncovered.  
**Beanies and Knit hats** absorb sweat and keep the head and ears warm.

## Arc Flash & Flame-Resistant Hoods

■ Meet NFPA 70E standards  
■ 40 cal/sq cm ATPV rating  
Protect worker's head, face, and neck from burns that can occur when working near electrical hazards. Hoods provide 360° protection and have a built-in faceshield.

**Lift Front** hoods have a faceshield that can be tilted up so workers don't have to remove the entire hood.

**Standard** hoods cover the head and face with a transparent faceshield for clear visibility.

**Ventilated** hoods have an integrated system that provides airflow to reduce heat stress.

## Arc Flash & Flame-Resistant Faceshields

■ Meet NFPA 70E standards  
Protect worker's head and face from burns while providing clear visibility to work area and surroundings.

**Faceshields** surround the face and extend slightly under the chin.

**Head Protection Kits** include hard hats with an integrated visor to protect workers from arc flash and impacts to the head. The visor flips up to provide unobstructed vision when protection is not required.
