DUNLOP PROTECTIVE FOOTWEAR | LACROSSE ESTABLISHED 1897 | TALON TRAX™

Waders

Waterproof waders are worn over the sock and extend to the hips or chest to cover more of the body than knee boots, allowing wearers to stay dry when working in deep water. They are worn by water and wastewater workers, plumbers, and others who work in deep water. Rubber and PVC are chemical-resistant. PVC weighs less than rubber, reducing fatigue when waders are worn for long periods of time.

Safety Criteria	Midsole Construction	Footwear Material	Brand	Item No.
PVC Chest Waders for General Use				
Defined Heel, Oil-Resistant Sole, Puncture-Resistant (PR), Steel Toe, Waterproof	Rigid Steel	Polyblend, PVC	Dunlop	**E8462**
Defined Heel, Steel Toe, Waterproof	Rigid Steel	PVC	Dunlop	**D0314**
PVC Hip-Waders for General Use				
Defined Heel, Oil-Resistant Sole, Plain Toe, Waterproof	Rigid Steel	PVC	Dunlop	**F2803**
Defined Heel, Oil-Resistant Sole, Puncture-Resistant (PR), Steel Toe, Waterproof	Rigid Steel	Polyblend, PVC	Dunlop	**E8464**
Defined Heel, Oil-Resistant Sole, Steel Toe, Waterproof	Rigid Steel	PVC	Dunlop	**E8463**

Anti-Fatigue Overshoes

Anti-fatigue overshoes attach to existing footwear to provide a cushioned base that can help reduce back and leg pain caused by standing or walking for long periods of time. They are often used by warehouse and assembly line workers and food service personnel where anti-fatigue mats are impractical. Anti-fatigue overshoes for **food service applications** are resistant to water, cleaning chemicals, and oils. **Lightweight overshoes** weigh less than general purpose overshoes to reduce fatigue when wearing them all day.

Safety Criteria	Midsole Material	Footwear Closure	Color	Item No.
Anti-Fatigue Overshoes for Food Service Applications				
Non-Metallic, Oil-Resistant Sole	Polymer PVC	Adjustable Straps	Black	**D4919**
Anti-Fatigue Overshoes for General Use
