Men's 6" Safety Work Boots

- Available in sizes 7 to 14; additional sizes at Grainger.com
- All meet ASTM F2413-11, except Style 804-6134

Style 804-6134—Quick-release, full-grain leather boots are easy to pull on or off. Flexible construction with a removable polyurethane footbed. Puncture-resistant with a tough, mini-lug outsole.

Style 804-4375—Full-grain leather upper with removable shock-absorbing footbed and cushion insole for comfort. Goodyear storm welt construction yields durability and long wear.

MAXWear slip-resistant outsole provides good grip and traction for rugged conditions.

Style 804-4200—Oil-tanned leather boots have a cotton drill vamp lining, removable dual-density molded polyurethane insole, rubber midsole, and single-density polyurethane MAXwear Wedge outsole. Engineered composite shank. Goodyear storm welt construction.

Style 804-6190—Waterproof side-zip boots have a leather/mesh upper with a BBP waterproof membrane lining. Feature removable polyurethane SHOCK ZONE insole and Z-Trac rubber outsole. Engineered composite shank reinforces arches. Cement construction.

Men's 6" Safety Work Boots

- Available in sizes 8 to 15
- Meet ASTM F2413-18

Note: All styles are available in medium width, many styles also available in wide width; go to grainger.com/footwear

Style 6351—Lightweight boots have oil-tanned leather uppers with a breathable waterproof membrane and sweat-wicking lining to keep feet dry and comfortable. Reinforced toe and heel resist impact. Enhanced arch support and shock-absorbing cushioning for all-day comfort.

Style 6366—Durable boots feature an oil-tanned leather upper, EVA midsole with PU Strobel pad, and a padded insole for maximum cushioning and flexibility. Sole is oil-, chemical-, and slip-resistant.

Style 6720—Oil-tanned leather boots have an internal metatarsal guard to protect the top of the foot from impact. Breathable, waterproof membrane and a moisture-wicking lining keep feet dry and comfortable. Polyurethane insole is cushioned to absorb shock. Rugged Flex rubber outsole gives flexibility and traction under tough conditions.

Style 6220—Bison boots have an oil-tanned leather upper and a dual-density polyurethane outsole with direct-attach welt construction for added durability. Feature a padded collar, foam-padded comfort tongue, and molded TPU heel counter with Achilles flex joint.
