

1-800-GRAINGER (472-4643)

FallTech Safety Harnesses

- Meet ANSI standards
- Available in multiple sizes

Comfortech Gel—Exclusive gel endo-skeleton design maximizes comfort. Dorsal SRL attachment sleeves and camlock torso adjusters provide secure connections and fit. Chest buckle features a visual indicator that confirms connection.

FlowTech LTE—FlowScape air channel padding keeps wearer cool. Lightweight aluminum hardware components minimize weight and user fatigue. Dorsal SRL attachment sleeves and camlock torso adjusters provide secure connections and fit.

FT-Iron—Built for ironworkers with form-fitting lateral leg straps that wrap around the thighs away from pressure points with no pinching or chafing. Reinforced subpelvic strap with durable wear pad. D-ring plate decreases slipping of SRLs for minimal readjustment during all-day wear. Breathable integral tri-layer padded shoulder yoke.

FT-One—Abrasion-resistant shoulder panels increase durability while gel inserts and padding disperse weight to provide comfort. Form-fitting lateral leg straps wrap around the thighs away from pressure points with no pinching or chafing. Trauma relief packs deploy quickly if a fall occurs.

FT-One Fit—Designed for women with adjustable hips to ensure a proper fit. Lateral leg straps wrap around the thighs away from pressure points for improved mobility. D-ring plate decreases slipping of SRLs for minimal readjustment during all-day wear.

Hi-Visibility—Includes ANSI Class 2 high-visibility mesh vest with integrated polyester web harness. Vest has one front and two rear zippered pockets with zippered side vents for easy access to hip D-rings.

Journeyman—Padded, vented shoulder yoke and waist support positioning pad for all-day comfort. Features integral soft-sling suspension and positioning seat. Friction roller torso adjusters offer a wide range of fit. Chest buckle has visual indicators that confirm connection. Includes fully adjustable suspension trauma relief system.

Arc Flash—Designed to withstand the hazards of arc flash exposure when working at height. Nylon webbing will not burn, melt, or conduct energy. Meet ASTM F887 standards.

WeldTech—Constructed with Nomex/Kevlar blend webbing throughout the shoulders, torso, and legs to resist burn and spatter when welding or grinding at height.
