3M Protecta Safety Harnesses

- Meet ANSI standards
- Available in multiple sizes
- P50**—Lightweight entry-level safety harnesses with polyester webbing and parachute torso adjusters.
- P200**—Polyester webbing with integrated auto-setting lanyard keepers that minimize the potential for tangling. Fixed dorsal D-ring reduces the need for readjustment throughout the workday.
- Hot work** harnesses are made from Kevlar fiber webbing that resists heat and damage from flames and sparks. Ideal for workers who are welding and grinding at height.

Safety Harness Trauma Relief Straps

Relieve pressure and improve circulation in the legs and hips while a suspended worker is awaiting rescue. Straps attach to compatible harnesses and create a loop beneath the worker's feet that he or she can stand on.

D-Ring Extenders

Connect to the D-ring on the back of a safety harness to make it faster and easier for workers with limited range of motion in their shoulders to make connections on the back of the harness. The extra length of the extender must be taken into account when calculating fall distance for the worker's fall arrest system.
