Combination Carbon Monoxide Detectors

▪ Volume Level: 85 dB @ 10 ft

Carbon monoxide (CO) and smoke detectors sound an alarm when high concentrations of CO or smoke are detected in the air. Combination units require less space to install and reduce the number of units that need to be installed, maintained, and tested.

Carbon monoxide (CO) and gas detectors sound an alarm when CO or explosive gases such as methane and propane are detected in the air. Units are installed near the floor as explosive gases are heavier than air and settle at floor level.

Heat Detectors

▪ Volume Level: 85 dB @ 10 ft

Detectors sound a warning when high heat or fast increases in air temperature have been detected. They're often used in kitchens, attics, and boiler rooms where the presence of smoke can cause false alarms in normal operation.

Strobe Light for Smoke & Carbon Monoxide Detectors

Strobe light works with carbon monoxide (CO) and smoke detectors to alert workers who are hearing impaired or are working in loud areas where an audible signal might not be heard.

Smoke Detector Testing Equipment

Equipment includes items required to test smoke or carbon monoxide detectors to ensure they're in good working order. Local fire codes often require units to be tested on a regular basis.

| Product Type | Item No. |
|---|----------|
| CO Detector Test | 36JG34 |
| Smoke Detector Aerosol Tester Equipment | 36JG31 |
| Smoke Detector Tester | 36JG35 |
| Smoke Detector Tester | 36JG36 |
| Starter Kit | 36JG32 |

Interconnection Relays

Relays automate tasks such as activating strobe lights, closing doors, or switching off HVAC systems when a detector is triggered.

| Product Type | Brand | Item No. |
|------------------------------|-------|----------|
| Carbon Monoxide Relay Module | Kidde | 3AU39 |
| Smart Relay | BRK | 2FTN7 |
| Smoke Alarm Relay Module | Kidde | 3KN55 |
