

Decontamination Showers and Equipment

Inflatable

Flexible Plastic

Showers wash chemical and biological contaminants from skin and clothing. They connect to a water source using a water supply hose similar to a garden hose to provide concentrated water for washdown. Showers are kept ready for deployment by first responders and first receivers, including hospitals, fire departments, and chemical plants. They meet ANSI/ISEA 113 standards for fixed and portable decontamination showers. **Framed** units have a metal or plastic frame to support the shower enclosure. Plastic frame showers offer good chemical resistance. Aluminum units are lightweight and easy to transport. **Inflatable** showers require an air compressor to set up. **Enclosed** units provide privacy.

Select showers based on patient type and their needs. **Ambulatory** patients can move through the system without help. **Semi-ambulatory** patients need some level of assistance sitting, standing, and clothing themselves. **Nonambulatory** patients cannot move through the shower on their own and need help.

Waste containment equipment holds decontamination shower wastewater to prevent run off that can contaminate surrounding areas. An inflatable pool construction is easier to store than framed pools. Flexible plastic constructed pools fold flat for storage. They feature a bladder with a threaded standard garden hose (SGH) adapter to attach a hose for collecting wastewater. For additional decontamination shower equipment visit Grainger.com.

No. of Stations	Number of Spray Heads	Shower/Pool Frame Material	Includes	For Patient Type	Size (H x W x D)	Inlet Connection	Series	Brand	Item No.
Open Framed Showers									
1	2	Plastic	(1) Carrying Bag		7 ½ ft x 2 ft x 5 ft		Decono	DQE	787RF4
1	2	Plastic	(1) Carrying Bag, (1) Containment Pool, (2) Elevation Grids	Ambulatory	7 ½ ft x 2 ft x 5 ft		Decono	DQE	787RF5

460U37

460U33

Self-Contained Decontamination Sprayers

Sprayers with a reservoir provide quick decontamination of targeted areas without setting up a full decontamination shower. 460U33 has a strong, steel frame for use in dry and noncorrosive environments.

Max. Flow Rate	Frame Material	Hose Length	Number of Spray Heads	Electrical Connection Type	Electrical Cord Length	Size (H x W x D)	Item No.
