Lever Locksets, Grade 1 and 2

▪ Backset: 2¾"

Cylindrical chassis fit common door preparation. These locksets feature through-bolt mounting studs for increased torque resistance and quick rekeying with BEST interchangeable cores. Hub torque springs provide extra resistance to lever sag. Preassembled hubs provide quick, simple installation.

9K Series—Low-maintenance design protects critical components from the damage that comes with everyday use. Vandal-resistant lever features a lost motion design that allows lever to move 45° to 60° without engaging retractor assembly. Attack-resistant design with slotted key release cam and locking lug assembly allow key access even if lock is damaged and ensure that lever is functional from inside of the door. Outside lever sleeve is a single piece of seamless, hardened steel alloy that delivers additional reinforcement in the locking lug slot.

7K Series—Keeper hole is not exposed on keyed levers providing increased security. Snap-on inside rose means no exposed mounting screws. Keyed lever is removable only after removal of core. Internal steel mechanisms are corrosion-treated for normal atmospheric conditions. The lockset is reversible for either hand of door without removing keyed lever.

Low-Profile Healthcare Latch, Grade 1

- Paddle style
- Strike: 4¾"
- Door thickness: 1¾"
- ►CHOOSE: Backset: 2¾", 3¾", 5" or 7"
- ►CHOOSE: Left or Right Handed

Features cylindrical latch application for passage function.

Flip Up Wide Paddle Push-Pull Latch—The push side of the paddle will flip up to be ligature-resistant, this application is used in behavioral health applications.

Quiet Push-Pull Latch—Features built in sound dampening functionality to provide a zero decibel solution specifically for patient healthcare environments. Can be field configured for any paddle designation and ease of use.

Wide Paddle Push-Pull Latch—Provides additional area on the paddle when pushing or pulling. Ideal for use in operating rooms along with patient rooms when additional leverage is needed.
