

Threaded Rod Hangers

- Heat-treated, case-hardened steel
 - Zinc-plated for corrosion resistance
- Hardened steel prevents snapping during installation or in high-stress environments 1-pc. design ensures a strong hold between screw and connector.

Notes: Nut drivers sold separately, this page.

Threaded rods are sold separately; see pages 2044, 2045.

SAMMYS

UNC anchors can be used to hang threaded rod from wood, steel, concrete, and metal deck. Color-coded to make it easy to select the correct-size Sammys nut driver; sold separately, this page.

Sammy X-Press—Anchors expand upon installation to stay in place without a retaining nut, for use where the back of the installed fastener is not accessible. Install quickly with Sammy X-Press It Installation Tool 36C177, sold separately, this page.

DEWALT

Wood and Steel hangers require no pre-drilling. Wood hangers have a Type 17 gimlet to help reduce splitting. Concrete hangers 54PD63, 54PD64, and 54PD65 are internally threaded; 54PD61 and 54PD62 have external 3/8" thread for direct attachment to anchors.

STRONG-TIE

Install quickly with no special installation tools. Hanger anchor 4XFX3 is designed for hanging installations. Coupler anchor 4XFW is designed for concrete foundations.

ROD HANGER DRIVERS AND EXTENSION ROD

Sammys drivers are color-coded by size for quick selection on the job.
