

Marine Sealants

Marine Adhesive Sealant Fast Cure 4200—Flexible bond for wood, fiber-glass, gelcoat, plastics, and metals.

Marine Adhesive Sealant 5200—Flexible sealant for wood, fiber-glass, metal and most plastics.

550 Adhesive Sealant—Medium paste forms permanent elastic bond on concrete, wood, aluminum, and most lacquered metals, polyester, glass, and stone.

730 UV Hybrid Sealant—Bonds material with differing thermal expansion.

740 UV Hybrid Sealant—Elastic bond for concrete, wood, aluminium, most lacquered metals, polyester, glass, stone, and ceramic. Can replace rivets and other fasteners.

DOWSIL 733 Glass and Metal Sealant—Conventional acetoxy RTV sealant with adhesion promoter.

Loctite Gasket Dressing SI 592—For use as a permanent seal above or below the water line.

Pneumatic Caulk Guns

- 1/4" MNPT inlet
- 326 lb. thrust ratio

Hold either single cartridges, sausage packs, or bulk forms of caulk or adhesive and dispense a smooth, continuous bead to minimize waste and form consistent seals. These pneumatic guns dispense caulk with greater control and less effort than manual guns. They run on compressed air and contain few moving parts, so they typically run cool, have a long lifespan, and weigh less than cordless guns.
