

For Aluminum and Soft Metals 54GU78

Starrett LENSX

Narrow Band Metal Cutting Saw Blades

Bimetal tipped

Blade widths up to 1/2" leave the blade flexible to make curved cuts. The ends of these metal-cutting blades are welded to form a continuous loop with a single cutting edge that cuts as the blade rotates through the workpiece. Blade material, tooth, and geometry are optimized for specific metals.

Standard Width Metal Cutting Band Saw Blades

■ Bimetal tipped

Range from $\frac{5}{8}$ " to 1" wide and cut metal in occasional maintenance and short-run production tasks. Blade material and tooth geometry are optimized to cut specific materials. Structural shape blades cut structural steel profiles such as tube and I-beams where the blade passes through different thicknesses of material in a single pass.
