

#### **SPEEDAIRE**

### **Small Air Receivers/Surge Tanks**

- Max. working pressure: 175 psi
- Plugs included in all openings
- Multiple openings and NPT thread sizes
- Black powder-coated finish

Designed for point-of-use air storage. Stationary, steel horizontal tanks are excellent for providing compressed air to short, peak-demand applications.

# **Oil/Water Separators**

Designed to separate emulsified compressor water and oil condensates using no electricity. Modules prevent contamination of upstream coalescing and carbon filters, extending downstream air line filter life.

#### **I·I·I** Intech Industries, Inc.

# **Oil Absorbing Oil/Water Separators**

2-stage absorption bags attract and hold oil like a magnet. They reduce condensate oil content to <10 ppm so that water can pass safely to the drain.

## **SPEEDAIRE**

## **Heavy-Duty Drip Leg with Automatic Float Drain**

Attaches to vertical leg of air system to collect moisture and automatically evacuate liquids using integral float drain. Valve opens when system is unpressurized, allowing gravity drainage. 6.61"H x 2.36"W.
