Bathroom Partitions

For technical help with partition design and material lists for your unique project, contact our technical product experts at 1-800 GRAINGER (472-4643).

Enclose toilets and urinals for privacy. Stalls are constructed with individual components such as panels, columns and doors. Commonly used in commercial, industrial, and office building bathrooms. **ADA-compliant doors** are wider than standard doors to accommodate wheelchairs. **Integrated privacy doors** connect with other parts and components to build a secure and private stall. They include seals that eliminate gaps and spaces for increased privacy.
