**Portable Blowers**

■ Nominal voltage: 115V AC

Feature a centrifugal wheel, housing, and exhaust outlets designed to create a targeted airstream. They provide the power of a stationary blower in a portable package that can be moved and used where it is needed. Ideal for drying floors, carpets, walls, or other hard-to-reach spaces during water remediation.

**Low-Profile Portable Blowers**

- Nominal voltage: 115V AC
- Fixed frame
- Daisy chain capable
- Power cord: 15 ft. L

These blowers can be easily moved and used where needed and feature a smaller footprint than regular portable blowers. Their outer housing features a stackable design that eases transportation and storage compared to regular portable blowers.

**Portable Fans**

- Nominal voltage: 115V AC

Provide the power of a stationary fan in a portable package that can be moved and used where it is needed. These axial fans use a traditional fan design rather than a blower wheel to move air and are best suited for high CFM applications such as general area drying, general ventilation, and cooling. The optional Extension Duct 5UN29 is semi-rigid and directs warm air into confined spaces; compatible with 5UN24.
