1	Pilot Lamp, Green Jewel	10H347
1	Switch, Double Push Button	10H353
1	Receptacle, Single 1 $\frac{1}{2}$ " Hole Diameter with Lift Cover	10H357

Appleton Group

Cast Device Boxes and Covers

Boxes feature accurately tapped and tapered threads for tight, rigid joints and ground continuity. A smooth, rounded integral bushing in each hub protects conductor insulation. Openings provide room to make splices and for general maintenance. Accommodate wiring devices like switches and receptacles. Corrosion resistant. Covers for Dry and Wet Locations mount directly on box. Covers for Wet Locations feature a gasket that seals around the plug to keep dirt and moisture out.

Weatherproof Boxes and Covers

Use with standard flush switches and receptacles. Suitable for outdoor, high-abuse areas and wet locations when used with cover and gasket, sold separately. Malleable iron boxes with NPT-tapered threads, integral bushings, and easily accessible internal grounding screws. Triple-coat Duraloy finish for high corrosion resistance. Lug brackets on all models except 2NA21, and 2NA28. FB-1 NEMA/IEC frame. Silver color.
