

**1-800-GRAINGER (472-4643)**

**Air Handler®**  
**Air Filter Rolls**

■ UL Classified

General use air filter roll media can be cut to size. Most commonly used as pre-filters to extend the life of more expensive final filters.

**Polyester, Blue/White**—For use where fiberglass filters are not acceptable or fiber break-off is a concern.

**Polyester, Orange/White**—Alternative for MERV 8 pleated filters and have a nonmigrating, heavy, dry tackifier on the downstream (orange) side.

**Fiberglass, Blue/White**—Bulk rolls replace hammock-type filters in furnaces and air conditioners. Progressively denser scrim-backed media (air entry to air exit).

**Hog Hair, Black or Blue**—Replace odd-size furnace filters. Stiff media fibers for rigidity and durability, and self-supporting with no frame required.

**Foam, Black**—Can replace disposable filters as a prefilter for higher-efficiency electronic or media cartridge filters. Wash or vacuum to clean.

**Air Handler®**  
**Air Filter Rolls for Automatic Roll Machines**

- UL Classified
- Cores are not interchangeable
- Type AE: American Air Filter units
- Type AE/CB: American Air Filter and Cambridge units
- Type C: Continental Air Filter units

These ready-to-install air filter rolls consist of a long length of filter media on a solid core that can be installed on automatic filter roll machines. When a filter change is needed, the machine automatically advances the correct amount of filter media to replace the existing media. These rolls are most commonly used as pre-filters to extend the life of more expensive final filters.

**Air Handler®**  
**Air Filter Pad Holding Frames and Clips**

Air filter pad holding frames provide support for air filter pads and allow you to just change the filter media in the air filter frame instead of throwing away the entire air filter. Permanent, reusable frames are constructed around a 24-ga. galvanized steel frame. The downstream side is 1" x 1", 16-ga. galvanized welded wire.

**Air Handler®**  
**Air Filter Pads**

- UL Classified
- Priced each; shipped in case qty., sold individually in-store only (except where noted)

6B735

Pads consist of nonpleated filter media that has been cut to a particular size and can be cut down to a smaller size if needed. Commonly used to replace dirty air conditioner filter pads.

**Polyester, Blue/White**—Offers higher arrestance and dust-holding than most fiberglass filters; won't shed fibers into the air stream.

**Fiberglass, Blue/White**—For heavy industrial and oily applications.
