## Industrial-Grade Negative Air Machines

Neutralize odors and remove particles such as dust, lead, mold, and debris from the air in abatement, restoration, construction, and demolition applications. 49K231 and 49K233 add VOC/odor neutralization. For filters and UV bulbs for all air machines, see Grainger.com and search for "negative air machine filters & UV bulbs."

## Medical-Grade Negative Air Machines

Remove bacteria, viruses, mold allergens, dust, and other small particles from the air in settings such as cleanrooms, medical clinics, and hospitals. They are often used for virus-containment and patient-isolation applications.
