## Disposable Standard Batteries

**Energizer DURACELL RAYOVAC**

Alkaline batteries are the most-common choice for most everyday applications. Lithium batteries provide level, consistent performance in all devices, including high-power-draw devices. Designed to be leakproof and perform well in extreme temperatures, from -40° to 140°F.

**Everyday**—All-purpose batteries for everyday use in devices such as flashlights, remote controls, clocks, smoke detectors, and other equipment that is used intermittently or has a low power draw.

**Premium**—Higher-tier batteries provide dependable performance in low-drain devices such as flashlights, remote controls, clocks, smoke detectors, medical devices, multimeters, and similar intermittent-use equipment.

**High Performance**—Top-tier, high-capacity batteries can handle power demand spikes from high-drain devices such as digital cameras, thermal imagers, digital audio players and recorders, drones, video game controllers, GPS equipment, and keyless locks.
