

2VHW1

**Berkshire**  
**Laboratory Wipes**

For cleaning delicate surfaces and equipment in laboratories, research facilities, hospitals, and manufacturing settings.

**GEORGIA-PACIFIC ACCUWIPE**

**Recycled Fiber**—Made with 100% recycled fiber. May contain incidental, less than 0.5% nonrecycled fibers.

**KIMBERLY-CLARK PROFESSIONAL**

**KIMTECH SCIENCE Kimtech**

**Delicate Task**—Light-duty wipes easily pick up liquids and dust. Antistatic dispensing helps reduce lint and electrostatic discharge.

**KIMTECH SCIENCE Kimtech**

**Precision**—Soft, absorbent wipes for general low-lint cleaning. Antistatic dispensing reduces lint. Coated packaging helps protect wipes from spills.

**BERKSHIRE**

**General Cleaning**—Nonwoven polyester/cellulose blend designed for spill control and wet wiping. Durx wipes are white; Bluesorb 750 are blue.

**Presaturated**—For use in wet cleaning and disinfecting of critical surfaces with no residue, where control of flammable solvents is required.

**Polyester Knit**—Excellent nonshedding wipes for applications where high concentrations of liquid are in use with rough surfaces. Ideal for aggressive cleaning and disinfecting.

**Gentle Task**—Extremely soft and gentle on surfaces. Very low lint. Contains no binders or additives. EcoClean 60 wipes are biodegradable.

**Cleanroom Swabs**

■ Pkg. of 100

Swabs are made for a variety of cleaning tasks in critical applications and cleanroom environments. 100 ppi reticulated foam. Laundered to be clean and pure before use.

**Sock-Tip Foam**—Solvent-resistant polypropylene handles sandwiched between two layers of the polyurethane foam head material.

**Closed-Foam**—Generate low particles and fibers; free of silicone, amides, and DOP (dioctyl phthalate).

**Open-Cell Foam**—Polyurethane foam sock heads over a rigid core.

**Polyester Knit**—Continuous-filament polyester knit heads for low particles, fibers, ions, and extractables. Highly abrasion-resistant and autoclavable.

**Polyester Nonwoven**—Flexible tips; made of hydroentangled polyester with low particle generation.

**LSS**  
**Bottle Top Filter Units**

Fast, clean polyethersulfone (PES) membranes lower the chance of removing critical protein components from media.

**LSS Bottle Top Filters**—Sterilized and packaged in individual bags. Fit on solution bottles in Filter Units, or other standard threaded solution storage bottles.

**Filter Units**—Include a solution bottle and a Bottle-Top Filter.

46Z315

**LSS**  
**Vacuum Manifolds**

Outlets are widely spaced for easy funnel positioning. Aluminum clamps are generously sized for one-handed operation. 2-way valve stopcocks provide a leakproof seal. Autoclavable manifolds use materials that stand up to repeated autoclave cycles.
