

## Assorted Hammer Sets

These sets include different types and sizes of hammers to perform a range of striking or positioning tasks. The tools in each set vary by the type of striking face, head size, handle length,

material, or other features. Sets can equip carpenters, construction workers, mechanics, and maintenance workers with a set of hammers without the hassle of selecting individual tools.

Container Type: Box	Hammers Included	Face Material	Head Weight	Face Dia.	Item No.
	2 lb Cross Pein, 32 oz Ball Pein, 4 lb Sledge Hammer	Steel	32 oz, 2 lb, 4 lb	1 3/8 in, 1 3/4 in	48FX56
	32 oz Ball Pein, 4 lb Dead Blow, 4 lb Sledge Hammer	Steel	2 lb, 4 lb	1 3/4 in, 2 1/4 in	48FX57
Container Type: None					
	2 1/2 lb 12" BASH Sledge Hammer, 4 lb 12" BASH Sledge Hammer, 2 lb 16" BASH Cross Pein Hammer, 24 oz 14" BASH Ball Pein Hammer, 32 oz 14" BASH Ball Pein Hammer, 40 oz 14" BASH Ball Pein Hammer, 1 1/2 lb 14" BASH Dead Blow Hammer, 3 lb 14" BASH Dead Blow Hammer	Rubber, Steel	2 lb, 3 lb, 4 lb	6 in, 8 in	793L71

## Sledge Hammers

Deliver high-impact blows to drive stakes and posts, loosen parts, strike wedges, and perform demolition work. They combine a heavy, double-faced head with a long handle to hit harder than lighter, shorter hammers. The broad face on each end of the head has a large striking area.

**Non-Sparking**—Have no ferrous metals and resist creating sparks to reduce the risk of ignition when delivering heavy blows in locations where combustible dust or flammable liquids, gas, or vapors are present.

**Soft-Face**—Softer than standard head helps decrease rebound and deliver a more focused blow that reduces damage to surrounding surfaces. Used to drive pins and position parts in machining and metal-working applications.

**Standard**—They can carry out demolition work where there is no need for a non-sparking sledge and no concern for damage to surrounding materials. Used to break stone and demolish masonry, drywall, and other building materials.
