Fixed-Blade Knives

Feature a sharp, rigid edge to cut tougher materials than folding or retractable-blade knives. The base (tang) of the blade anchors into the handle to prevent shifting. The exposed blade does not retract into the handle. **General Purpose** perform a range of cutting tasks when a specialized knife isn't required. **Non-Sparking** resist creating sparks to reduce the risk of ignition when making cuts where combustible dust or flammable liquids, gas, or vapors are present. **Rescue Knives** are commonly used by first responders to cut through seatbelts or punch through auto glass. **Flooring Knives** pierce and cut through linoleum, vinyl tile, carpet, and other flooring materials. **Duct Knives & Cutters** are ideal for cutting sheet metal, duct board, and other rigid duct materials.
