	10 ft		41D249
	12 ft		41D250

Adjustable Enclosed Safety Cages

- Nonconductive, high-strength, fiberglass-resin composite
- Fully adjustable 1-ft. increments

Offer versatile, safe alternative to tie-off, allowing access to constricted areas and drop ceilings while complying with tie-off rules. Help protect operators in a fully enclosed working platform, allowing them to work safely and quickly with 2 hands. Each side adjusts independently to multiple heights; adjusts to work safely on uneven surface and stairs. Models with Wheel Lift casters allow cage to move from place to place fully deployed. Built-in Tip & Glide wheels make it quick-and-easy to roll anywhere.

Series	Platform Height	Includes	Item No.
Type 1AA, 375 lb Duty Rating			
Compact Safety Cage	4 to 6 ft	Tip and Glide Wheels	48RR82

	5 to 9 ft	Net, Outriggers, Wheel Lift	36GL23
	8 to 14 ft		36GL24

36GL23

Ladder Jacks, Planks and Leveler

Aluminum Extension Planks - PA200 Series—Made of 2" deep box section extrusions for outstanding rigidity in ladder jack, trestle ladder, and step stool applications. Locking mechanism sets plank in 12" increments; positive stops prevent overextending.

WARNING: When assembled as a scaffold or staging, planks must be used in conjunction with suitable guardrail protection in compliance with applicable governmental codes, ordinances, regulations, and safe practices.

Ladder Jack Clamping System—Ladder jacks mount to either side of extension ladder and clamps securely hold stage platform to ladder jacks. OSHA and ANSI Standards require ladder jacks only be used on Type 1, Type 1A, or Type 1AA ladders.

- Accommodates up to 20"W stage planks

Description	Series	Overall Length	Load Capacity	Material	Item No.
Extension Plank	PA200	6 to 9 ft	250 lb	Aluminum	4XP30
